PROFILE SUMMARY

Full-stack developer with strong frontend specialization and hands-on experience in building scalable web products across eCommerce, EdTech, and event-tech. Proven ability to modernize legacy systems, optimize user flows, and deliver production-grade platforms end-to-end. Multi-hackathon winner with expertise in Django, REST APIs, SQL, React, and dynamic pricing/token-based systems. Entrepreneurial mindset demonstrated through launching NavRang and Print-It, driving both tech execution and business outcomes

EDUCATION

- B.E. Computer Engineering — Universal College of Engineering (2027)
- HSC — Sardar Vallabhbhai College of Science & Commerce
- SSC — St. Xavier's High School (71.4%)
- MHT-CET: 84.44 Percentile

SOFT SKILLS

- Problem Solving
- Adaptability
- Communication
- Collaboration & Ownership

CERTIFICATIONS

- JavaScript Bootcamp
- Power BI Certification
- Django (Self-taught through production-grade projects)

FUTURE GOALS

- Advance backend depth, API security & AI/ML integration.
- Secure a technical role in fintech/e-commerce ecosystems.
- Expand expertise in Next.js, Python & AI-driven engineering.

WORK EXPERIENCE

Full Stack Developer—YASH Optics & Lens (Lustraa Lenses)(Currently Working)

- Modernized legacy frontends to uplift UX, performance, and conversion metrics.
- Transitioned internal ordering processes into customer-first self-service workflows.
- Automated operational bottlenecks via reverse engineering & DevTools-driven enhancements.
- Drove cross-functional alignment between tech architecture and business operations.

Web Development Intern — Get Analyticx

- Delivered a task-based learning platform enabling structured weekly workflows.
- Built a college predictor tool adopted by 50%+ students in Mira Road.
- Facilitated company-branded YouTube development sessions to scale learning velocity.

Freelance Developer — RND Foods

- Engineered a custom WordPress solution with tailored theming & plugins.
- Deployed production-grade infrastructure and secured client certification.

ENTREPRENEURSHIP

NavRang — Founder

- Shipped full-stack eCommerce stack with authentication, cart engine & Razorpay payments.
- Achieved profitable Navratri-season sales through integrated tech + operations execution.

Print-It — Founder

- Building a hyperlocal printing & merchandise platform with a scalable delivery model.

Devora — Co-Founder (Pre-Launch)

- Designing an end-to-end client onboarding and product showcase ecosystem.

PERSONAL PROJECTS

- Swapora: Token-based barter system with chat negotiation & rating logic; 500+ trades tested.
- VibeTix: Ticketing platform enabling dynamic pricing, QR check-ins & split payments (30% faster ops).

HACKATHON ACHIEVEMENTS

- Hackathonix Winner — Built VibeTix with dynamic pricing & QR entry; boosted check-ins by 30%.
- Technova Winner — Developed Swapora, an engagement-centric skill-bartering platform with 40% higher interaction.
- 2× SIH Internal Selection (2024 & 2025).

TECHNICAL SKILLS

- Frontend: HTML, CSS, JavaScript, Bootstrap, Tailwind, React.js
- Backend: Django, DRF, Node.js (Basics), MySQL, PostgreSQL
- Platforms/Tools: Git, GitHub, Firebase, Vercel, Netlify, Agile
- Specialized: Dynamic Pricing, Token Economy Systems, Chat Systems, Power BI, AI/ML Fundamentals
